```

- Alguns celulares não estão com o SO compatível com o modelo
- Ex.: Samsung Galaxy com SO Windows Phone
- Isso aconteceu porque o SO de alguns retornavam nulo, para evitar um NullPointerException, colocamos um SO randômico

```
else if (lowercaseLine.contains("sistema operacional") || lowercaseLine.contains("versão"))
    so = this.getOS(lowercaseLine);
    if(so == null) {
        Random rand = new Random();
        int soRand = rand.nextInt(3);
        switch (soRand) {
            case 0:
                so = "android";
                break;
            case 1:
                so = "ios";
                break;
            case 2:
                so = "windows_phone";
                break;
    insertOS(so, fileName, position);
